Ideation Phase
Empathize & Discover

Date	28 September 2026
Team ID	SWTID-2026-2169
Project Name	Import Data Using Transform Map
Maximum Marks	4 Marks

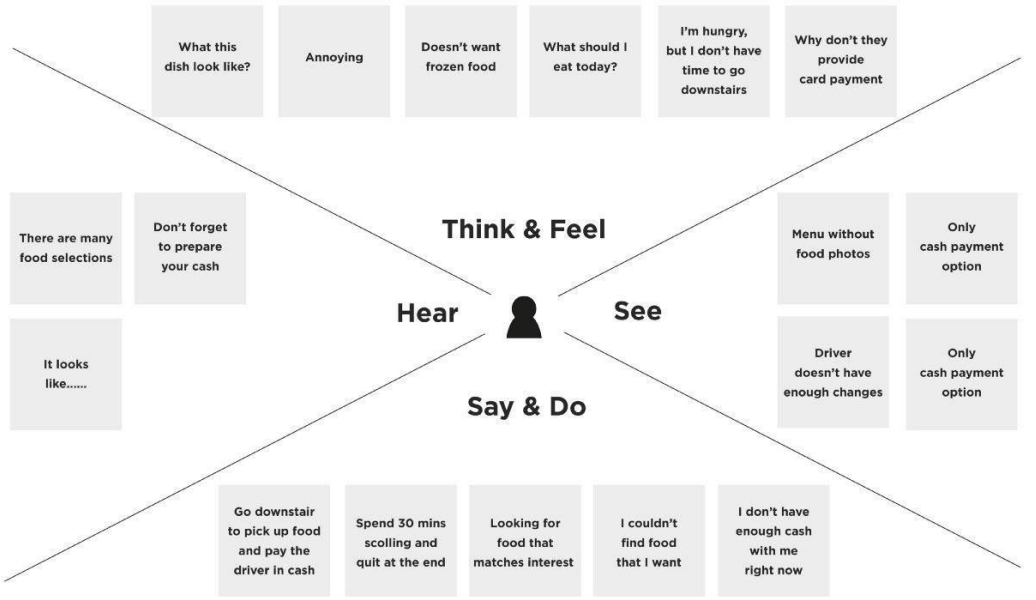

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about the behaviours and attitudes of people who import data into Service Now, such as administrators, developers and HR or business users. It is a useful tool that helps the team better understand these users while they upload files, map fields and check the results of a Transform Map. Creating an effective solution requires understanding the true problem and the person who is experiencing it, for example the frustration of duplicate records or failed rows. The exercise of creating the map helps participants consider things from the user's perspective, along with their goals and challenges during the data import process.

Example:

Example: Food Ordering & Delivery Application

Pain

- Hard to find their food interests
- Uncomfortable paying cash
- Looking for food that matches interest

Gain

- Comfortable
- Accuracy
