Functional & Performance Testing Template

Model Performance Test

Date	29 September 2026
Team ID	SWTID-2026-2169
Project Name	Import data using transform map
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Data Source Validation (Excel file)	Upload a valid and an invalid Excel file as data source	Valid file loads into Import Set table, invalid file shows error	As expected	Pass
FT-02	Field Mapping Validation	Map source fields to target fields with correct and mismatched types	Correct mapping accepted, errors shown for invalid mapping	As expected	Pass
FT-03	Data Import using Transform Map	Load data and run the Transform Map	Records are inserted into the target table correctly	As expected	Pass
FT-04	ServiceNow Instance Check	Check that the instance is accessible and Import Set table is created	Instance responds and Import Set table is available	As expected	Pass
PT-01	Import Time Test	Use a timer to check time taken to load and transform data	Should complete within acceptable time	As expected	Pass

PT-02	Concurrent Import Test	Run multiple imports at the same time	Instance should not slow down	As expected	Pass
PT-03	File Upload Load Test (large Excel files)	Upload large Excel files and check processing	Should work smoothly without errors	As expected	Pass
