Project Demo Planning

Date	29 September 2026
Team ID	SWTID-2026-2169
Project Name	Import Data using Transform Maps
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project on Import Data using Transform Maps, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Brief overview of the business need for efficient data import, challenges with manual mapping, and the role of Transform Maps in solving data integration problems.	3	Member 1
2	Solution Architecture Overview	Explain the high-level architecture: source data (CSV/Excel), Transform Map configuration layer, field mapping engine, validation rules, and target Salesforce /	4	Member 2
3	Create & Configure Transform Map	Live demo of creating a new Transform Map, selecting source and target objects, setting unique identifiers, and defining basic map properties.	4	Member 1
4	Field Mapping & Transformation Rules	Demonstrate mapping source fields to target fields, applying data type conversions, formulas, default values, lookups, and handling null/empty values.	5	Member 2
5	Validation, Error Handling & Bulk Import	Show pre-import validation, error logging, duplicate detection, and successful bulk import execution with progress tracking and result summary.	5	Member 3
6	Post-Import Reporting & Closing	Display import summary dashboard (inserted/updated/failed records), downloadable reports, and brief Q&A; preparation notes.	3	Member 3

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Highlight real-world data import challenges and why Transform Maps are needed.
2	Solution Overview	Walk through architecture diagram and key components of the Transform Map solution.
3	Live Feature Demonstration	End-to-end demo: create map → map fields → apply rules → validate → import → review results.
4	Q&A; Session	Address questions on scalability, error handling, supported file formats, and future enhancements.
